

EDUCATIONAL TRIP

CLASS XII

The Regional Science Centre Bhuj is a masterpiece of Architectural Design developed on 10 acres of land with six unique galleries with science based themes – Space Science, Marine Navigation, Energy Science, Nanotechnology, Bonsai, Fields Medal. Galleries are designed to stimulate curiosity and keep learning alive for life. Apart from galleries the centre is equipped with special attractions like Marine Navigation and Submarine Simulator, 3D Theatre, Observatory for Astronomical Exploration, Cafeteria and open courtyards for leisurely retrieval of information.

The school organized an educational trip to the Regional Science Centre in Bhuj for Class XII on 13 April, 2024. 41 students and two escort teachers visited this incredible centre.

The students were guided and explained various topics in a unique manner so as to expose them to new ways of thinking, to experience science and inspire innovation. The students were escorted to view the various galleries which are themed on different scientific concepts. The students were amazed to see the wonderful work and display of the various galleries. The students were also given an opportunity to perform experiments which helped in stimulating and inspiring the inquisitive minds.

On the whole, the visit to the Centre was very informative and enjoyable for the students.

A report from W.V.M.
